

Catalog Number: 101111, 194840

BRIJ 35

Molecular Formula: $C_{12}H_{25}(OCH_2CH_2)_{\sim 46}OH$

Molecular Weight: 1225

CAS # : 9002-92-0

Synonym: Polyoxyethylene 23 Lauryl Ether

Physical Appearance: White waxy solid

Aggregation Number: 20-40

Critical Micelle Concentration (CMC): 0.05-0.1 mM Detergents with high CMC values are generally easy to remove by dilution; detergents with low CMC values are advantageous for separations on the basis of molecular weight. As a general rule, detergents should be used at their CMC and at a detergent-to-protein weight ratio of approximately ten.²⁻³

Solubility: Soluble in water, ethanol, toluene; miscible with hot material, natural and synthetic oils, with fatty alcohols and fats; insoluble in mineral oil and vegetable oils
