Protease Inhibitor Cocktails

| <u>Code</u> | <u>Description</u> | <u>Size</u> |
|-------------|--|-------------|
| M221-1ml | Protease Inhibitor Cocktail, General Use Supplied as lyophilized powder. Each vial can be reconstituted in 1 ml deionized water to form a 100X solution. | 1.0 ml |
| M222-1ml | Protease Inhibitor Cocktail, General Use with EDTA Supplied as lyophilized powder. Each vial can be reconstituted in 1 ml deionized water to form a 100X solution. | 1.0 ml |
| M250-1ml | Protease Inhibitor Cocktail, Mammalian Supplied as lyophilized powder. Each vial can be reconstituted in 1 ml deionized water to form a 100X solution. | 1.0 ml |
| M306-5ml | Protease Inhibitor Cocktail, Bacterial Supplied as lyophilized powder. Each vial contains sufficient material to provide 5 ml of a 20X solution upon reconstitution. | 5.0 ml |
| M307-1ml | Protease Inhibitor Cocktail, Plant Supplied as lyophilized powder. Each vial can be reconstituted in 1 ml dimethyl sulfoxide to form a 100X solution. | 1.0 ml |

General Information:

Protease inhibitors are critical reagents for the preservation of protein integrity during purification and analysis procedures. Inhibitor cocktails are extensively used to provide broad spectrum protection during cell lysis and tissue dissolution. These cocktails target a range of different proteases including serine, cysteine, aspartic and metalloproteases as well as aminopeptidases.

AMRESCO offers four protease inhibitor cocktails designed to preserve the protein composition of samples in a broad range of organisms. A general use cocktail is available with or without EDTA, while specific formulations are available for mammalian, bacterial or plant lysates. All formulations are prepared from ultrapure reagents to ensure maximum inhibition of the specified proteases. Cocktails are provided as convenient, easy-to-use powders that can be reconstituted in the supplied vials.

Check the current AMRESCO catalog for a comprehensive listing of all AMRESCO protease inhibitors.

Storage/Stability:

The lyophilized powder should be stored at -20°C where it is stable for up to 1 year. The reconstituted solution should be stored at -20°C where it is stable for up to 2 weeks. Repeated freezing and thawing cycles of the reconstituted solution is not recommended.

Application Disclaimer

For Research Use Only. Not for Therapeutic or Diagnostic Use.

Protocols and Formulations

→ Note: Reconstituted cocktails should be aliquoted into multiple tubes and stored at -20°C. Multiple freezing and thawing cycles are not recommended.

M221-1ML, General Use Protease Inhibitor Cocktail M222-1ML, General Use Protease Inhibitor Cocktail with EDTA

Preparation of 100X Solution:

- 1. Add 1 ml deionized, distilled water and mix gently until powder is completely resuspended.
- 2. Aliquot into multiple tubes and store at -20°C.

| <u>Name</u> | <u>MW</u> | 100X Concentration | Recommended Working Concentration |
|-------------|-----------|-----------------------|-----------------------------------|
| AEBSF | 239.5 | 50.00 mM | 0.50 mM |
| Aprotinin | 6512.0 | 30.00 uM | 0.30 uM |
| Bestatin | 308.4 | 1.00 mM | 10.00 uM |
| E-64 | 357.4 | 1.00 mM | 10.00 uM |
| Leupeptin | 493.6 | 1.00 mM | 10.00 uM |
| EDTA* | 372.2 | 5.00 mM | 50.00 uM |

^{*} Present only in M222- 1ML

M306-5ML Bacterial Protease Inhibitor Cocktail

Preparation of 20X Solution:

- 1. Add 1 ml DMSO to vial and vortex 1 minute.
- 2. Add 4 ml deionized, distilled water and mix.
- 3. Aliquot into multiple tubes and store at -20°C. (solution may be cloudy and precipitate may be present)

| <u>Name</u> | <u>MW</u> | 20X Concentration | Recommended Working Concentration* |
|-------------|-----------|----------------------|------------------------------------|
| AEBSF | 239.5 | 22.00 mM | 1.10 mM |
| Bestatin | 308.4 | 1.87 mM | 9.35 uM |
| E-64 | 357.4 | 220.00 uM | 11.00 uM |
| Pepstatin | 685.9 | 2.20 mM | 110.00 uM |
| EDTA | 372.2 | 93.00 mM | 4.65 mM |

^{*1} ml of solution is sufficient to inhibit 20 ml of lysate from 4 g (wet weight) of *E. coli* cells.

M250-1ML, Mammalian Protease Inhibitor Cocktail:

Preparation of 100X Solution:

- 1. Add 1 ml deionized, distilled water and mix gently until powder is completely resuspended.
- 2. Aliquot into multiple tubes and store at -20°C.

| <u>Name</u> | <u>MW</u> | 100X Concentration | Recommended Working Concentration |
|-------------|-----------|-----------------------|-----------------------------------|
| AEBSF | 239.5 | 120.00 mM | 1.20 mM |
| Aprotinin | 6512.0 | 46.00 uM | 0.46 uM |
| Bestatin | 308.4 | 1.36 mM | 14.00 uM |
| E-64 | 357.4 | 1.23 mM | 12.30 uM |
| Leupeptin | 493.6 | 11.20 mM | 112.00 uM |
| Pepstatin | 685.9 | 116.00 uM | 1.16 uM |

M307-1ML, Plant Protease Inhibitor Cocktail:

Preparation of 100X Solution:

- Add 1 ml dimethyl sulfoxide and mix gently until powder is completely resuspended.
- 2. Aliquot into multiple tubes and store at -20°C.

| <u>Name</u> | <u>MW</u> | 100X Concentration | Recommended Working Concentration |
|-------------------------|-----------|-----------------------|-----------------------------------|
| AEBSF | 239.5 | 220.00 mM | 2.20 mM |
| Bestatin | 308.4 | 10.70 mM | 107.00 uM |
| E-64 | 357.4 | 3.00 mM | 30.00 uM |
| Leupeptin | 493.6 | 2.00 mM | 20.00 uM |
| Pepstatin | 685.9 | 2.20 mM | 22.00 uM |
| 1,10- Phenanthroline | 198.2 | 550.00 mM | 5.50 mM |

Inhibitor Specificity

| Name | Inhibition Specificity |
|-------------------------|---|
| AEBSF | Irreversible serine protease inhibitor Chymotrypsin Trypsin Kallikrein Plasmin Thrombin. Non-toxic alternative for PMSF |
| Aprotinin | Competitive, reversible serine protease inhibitor Chymotrypsin Trypsin Kallikrein Plasmin Does not inhibit Factor Xa or thrombin |
| Bestatin | Competitive aminopeptidases inhibitor Aminopeptidase B Leucine aminopeptidase Tripeptide amonopeptidase Does not inhibit carboxypeptidases |
| E-64 | Irreversible cysteine protease inhibitor Papain Calpain Cathepsin B, H, L and S Effective inhibitor of collegenase |
| EDTA | Reversible metalloprotease inhibitor – Chelates metal ions |
| Leupeptin | Reversible cysteine and serine protease inhibitor Trypsin Plasmin Papain Kallikrein Thrombin Cathepsin A and B Effective inhibitor of collegenase |
| Pepstatin | Aspartic acid protease inhibitor Pepsin Renin Cathepsin D Insoluble in water |
| 1,10- Phenanthroline | Metalloprotease inhibitor – Chelates iron and other divalent cations |
