

Anti-Mouse CD11a APC

Catalog Number: 17-0111

Also known as: Integrin alpha L, Lymphocyte Function-Associated Antigen

RUO: For Research Use Only. Not for use in diagnostic procedures.

Staining of C57Bl/6 splenocytes with 0.25 ug of Rat IgG2a K Isotype Control APC (cat. 17-4321) (blue histogram) or 0.25 ug of Anti-Mouse CD11a APC (purple histogram). Total viable cells were used for analysis.

Product Information

Contents: Anti-Mouse CD11a APC

Catalog Number: 17-0111

Clone: M17/4

Concentration: 0.2 mg/mL

Host/Isotype: Rat IgG2a, kappa

Formulation: aqueous buffer, 0.09% sodium azide, may contain carrier protein/stabilizer

Temperature Limitation: Store at 2-8°C. Do not freeze. Light-sensitive material.

Batch Code: Refer to vial

Use By: Refer to vial

Contains sodium azide

Description

The M17/4 monoclonal antibody reacts with mouse CD11a, the 180 kDa integrin alpha L, also known as the lymphocyte function associated antigen-1 (LFA-1) alpha chain. LFA-1, formed by non-covalent association of CD11a with CD18 (integrin beta 2), serves as an important adhesion molecule involved in lymphocyte and granulocyte function. CD54 (ICAM-1), CD102 (ICAM-2), and CD50 (ICAM-3) are ligands for LFA-1. CD11a is expressed by all leukocytes.

Applications Reported

This M17/4 antibody has been reported for use in flow cytometric analysis.

Applications Tested

This M17/4 antibody has been tested by flow cytometric analysis of mouse splenocytes. This can be used at less than or equal to 0.5 µg per test. A test is defined as the amount (µg) of antibody that will stain a cell sample in a final volume of 100 µL. Cell number should be determined empirically but can range from 10⁵ to 10⁸ cells/test. It is recommended that the antibody be carefully titrated for optimal performance in the assay of interest.
