RapidDirect™ Primary Antibody polyHRP Labeling Kit

Storage: Store at 4°C

Catalog Number: A-9402-001

Lot Number:

Components:	Component #:	Units:
S-HyNic	A-9402-001-01	100 µg
4FB-HRP	A-9402-001-02	50 µL
1X Modification Buffer	A-9402-001-03	5 mL
0.8 mL Red Spin Column	A-9402-001-04	2 columns
0.8 mL Yellow Spin Column	A-9402-001-05	1 column
1.5 mL Collection Tubes	A-9402-001-06	6 tubes
Anhydrous DMF	A-9402-001-07	0.2 mL

Test	Specification	Result
Assay Performance	Conjugation of Mouse beta-Actin antibody with 4FB-HRP. Performance by western blot.	Passed

Product Description

The RapidDirect Primary Antibody polyHRP labeling Kit is designed to conjugate one antibody to high-activity HRP. Reaction requires 100 µg of user-supplied antibody. Any suitably pure monoclonal or polyclonal antibody can be conjugated to pre-activated HRP and enough for at least 10 blots..

This product features high-activity, pre-activated HRP, along with Solulink's catalyzed conjugation chemistry, resulting in high specific activity conjugates.

Application

Conjugation of user-supplied primary antibody with polyHRP.

Comments

Store at 4°C until kit is used. Not for internal or external use in humans.
