Description

Gel Loading Dye, Blue (6X) is a pre-mixed loading buffer with one tracking dye for agarose and non-denaturing polyacrylamide gel electrophoresis. This solution contains SDS, which often results in sharper bands, as some restriction enzymes are known to remain bound to DNA following cleavage. EDTA is also included to chelate magnesium (up to 10 mM) in enzymatic reactions, thereby stopping the reaction. Bromophenol blue is the standard tracking dye for electrophoresis. It migrates at approximately 300 bp on a standard 1% TBE agarose gel.

Properties and Usage

Storage Temperature
25°C

Buffer Components
2.5% Ficoll®-400
11mM EDTA
3.3mM Tris-HCl
0.017% SDS
0.015% bromophenol blue
pH 8.0@25°C

Quality Control

Quality Assurance Statement

- * Gel Loading Dye, Blue (6X) is assayed for contaminating endonuclease, exonuclease and RNase activity.

Notes

1. Use 5 µl of Gel Loading Dye, Blue (6X) per 25 µl reaction, or 10 µl per 50 µl reaction. Mix well before loading gel.

Supporting Documents

Material Safety Datasheets

The following is a list of Material Safety Data Sheets (MSDS) that apply to this product to help you use it safely. The following file naming structure is used to name these document files: [Product Name]MSDS. For international versions please contact us at info@neb.com.
