Technical Data Sheet

PE Rat IgG2b, κ Isotype Control

Product Information

| Material Number: | 553989 |
|------------------|--|
| Size: | 0.1 mg |
| Concentration: | 0.2 mg/ml |
| Clone: | A95-1 |
| Immunogen: | TNP-Keyhole Limpet Hemocyanin |
| Isotype: | Rat (LOU) IgG2b, κ |
| Storage Buffer: | Aqueous buffered solution containing $\leq 0.09\%$ sodium azide. |

Description

The A95-1 antibody has unknown specificity. Trinitrophenal (TNP), the immunogen, is a hapten that is not expressed on human, mouse, rat, or non-human primate cells. The A95-1 immunoglobulin was selected as an isotype control following screening for low background on a variety of mouse and human tissues.

Preparation and Storage

Store undiluted at 4°C and protected from prolonged exposure to light. Do not freeze.

The antibody was conjugated with R-PE under optimum conditions, and unconjugated antibody and free PE were removed.

The monoclonal antibody was purified from tissue culture supernatant or ascites by affinity chromatography.

Application Notes

| Flow cytometry | Routinely Tested | |
|-----------------|------------------|--|
| Isotype control | Routinely Tested | |

Recommended Assay Procedure:

An isotype control should be used at the same concentration as the antibody of interest (e.g., $\leq 1 \, \mu g/million$ cells for flow cytometry).

Product Notices

- 1. Since applications vary, each investigator should titrate the reagent to obtain optimal results.
- 2. Please refer to www.bdbiosciences.com/pharmingen/protocols for technical protocols.
- 3. For fluorochrome spectra and suitable instrument settings, please refer to our Fluorochrome Web Page at www.bdbiosciences.com/colors.
- 4. Caution: Sodium azide yields highly toxic hydrazoic acid under acidic conditions. Dilute azide compounds in running water before discarding to avoid accumulation of potentially explosive deposits in plumbing.
