

Technical Data Sheet

Purified Mouse Anti-Human MCL-1

Product Information

Material Number:	559027
Size:	0.1 mg
Concentration:	0.5 mg/ml
Clone:	22/Mcl-1
Immunogen:	Purified recombinant human Mcl-1 lacking the C-terminal hydrophobic domain
Isotype:	Mouse IgG1, κ
Reactivity:	QC Testing: Human
Target MW:	40 kDa
Storage Buffer:	Aqueous buffered solution containing ≤0.09% sodium azide.

Description

The Bcl-2 family of proteins plays a pivotal role in determining the life and death of a cell. Members of the Bcl-2 family all possess at least one of four conserved Bcl-2 homology domains (BH1-BH4) which mediate protein-protein interactions. They can be divided into molecules that have either an anti-apoptotic or pro-apoptotic function. The ratio between these two groups of molecules can help determine whether a cell lives or dies. The majority of anti-apoptotic family members contain common BH1-BH4 domains and are most similar to Bcl-2. Mcl-1 is a member of the anti-apoptotic Bcl-2 group of proteins, including Bcl-x, Bcl-w, A1/Bfl-1, Boo/Diva, and Nr-13. Mcl-1 was cloned from the ML-1 human myeloblastic leukemia cell line. Mcl-1 localizes to the mitochondria, like Bcl-2, but also associates with membranes via its C-terminal hydrophobic domain. Further studies have shown that Mcl-1 is upregulated in response to the GM-CSF and IL-3 cytokine signaling pathways and that this regulation of Mcl-1 is controlled at the level of transcription. Mcl-1 is detected at approximately 40 kDa in SDS/PAGE.

Western blot analysis of Mcl-1. Lysates from K-562 cells were probed with anti-human Mcl-1 antibody (clone 22, Cat. No. 559027) at a concentration of 2 µg/ml. Mcl-1 is identified at approximately 40 kDa.

Preparation and Storage

The monoclonal antibody was purified from tissue culture supernatant or ascites by affinity chromatography. Store undiluted at 4° C.

Application Notes

Application

Western blot	Routinely Tested
Immunoprecipitation	Tested During Development

Recommended Assay Procedure:

The antibody is tested by Western blot on K-562 cell lysate (ATCC CCL-243). Other applications include immunoprecipitation (1-2 µg/ml).

Suggested Companion Products

Catalog Number	Name	Size	Clone
611550	K-562 Cell Lysate	500 µg	(none)
554002	HRP Goat Anti-Mouse Ig	1.0 ml	(none)

Product Notices

1. Since applications vary, each investigator should titrate the reagent to obtain optimal results.
2. Please refer to www.bdbiosciences.com/pharming/en/protocols for technical protocols.
3. Caution: Sodium azide yields highly toxic hydrazoic acid under acidic conditions. Dilute azide compounds in running water before discarding to avoid accumulation of potentially explosive deposits in plumbing.
