# BD™ Cytometric Bead Array (CBA)

## Technical Data Sheet Human IL-2 Enhanced Sensitivity Flex Set

#### Product Information

- Material Number: Size: Bead Position: Assay Range: Reactivity:
- 561517 100 Tests A4 274-200,000 fg/mL QC Testing: Human

Component Description: Component Mat. No: Component Storage Buffer:

Component Description: Component Mat. No: Component Storage Buffer:

Component Description: Component Mat. No: Component Storage Buffer: Human IL-2 Standard 51-9003293 Lyophilized in an aqueous buffered solution containing BSA and ProClin<sup>™</sup> 150. Human IL-2 Enhanced Sensitivity Capture Bead A4

51-9007212 Aqueous buffered solution containing fetal bovine serum and  $\leq 0.09\%$  sodium azide.

Human IL-2 Detection Reagent (Part A) 51-9007213 Aqueous buffered solution containing BSA and ProClin<sup>™</sup> 150 as preservative.

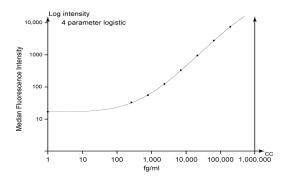

Figure 1. Example BD CBA Human IL-2 Enhanced Sensitivity Flex Set standard curve. Data acquired on a BD FACSArray bioanalyzer and analyzed using FCAP Array Software.

## Description

The BD<sup>TM</sup> CBA Human IL-2 Enhanced Sensitivity Flex Set is a bead-based immunoassay capable of measuring human Interleukin-2 (IL-2) in serum, plasma, and cell culture supernatant samples. The BD CBA Enhanced Sensitivity Flex Sets are capable of measuring soluble analytes present in very low concentrations. For more information on bead-based immunoassays, refer to the product insert for the BD CBA Human Enhanced Sensitivity Master Buffer Kit (Cat. No. 561521 or 561523).

This BD CBA Enhanced Sensitivity Flex Set contains one vial each of Enhanced Sensitivity Capture Bead and Detection Reagent (Part A) and two vials of Standard. The Enhanced Sensitivity Detection Reagent (Part B) is provided in the BD CBA Human Enhanced Sensitivity Master Buffer Kit. The Enhanced Sensitivity Capture Bead and Detection Reagent (Part A) components of this flex set have been formulated to a 20x concentration to ensure product performance when multiplexed. The Standard component is lyophilized and when reconstituted according to the instructions in the BD CBA Human Enhanced Sensitivity Master Buffer kit, the top standard point for this assay is 200,000 fg/mL. Discard unused reconstituted standard, do not store or reuse. Store lyophilized standard and other components at 4°C. Protect Capture Beads and the Detection Reagent from prolonged exposure to light.

## Application Notes

Recommended Assay Procedure: The BD CBA Human IL-2 Enhanced Sensitivity Flex Set must be used in conjunction with a BD CBA Human Enhanced Sensitivity Master Buffer Kit (Cat. No. 561521, 100 tests, or 561523, 500 tests), a flow cytometer, and FCAP Array<sup>™</sup> Software. Detailed instructions on the use of this product can be found in the manual for the BD CBA Human Enhanced Sensitivity Master Buffer Kit. When following the directions in the Master Buffer Kit, the standard range for the BD CBA Human IL-2 Enhanced Sensitivity Flex Set will be 274 to 200,000 fg/mL. An example standard curve is shown in Figure 1.

The BD CBA Human IL-2 Enhanced Sensitivity Flex Set should only be used in the same assay well with other BD CBA Human Enhanced

Sensitivity Flex Set reagents. We do not recommend plexing Enhanced Sensitivity Flex Set assays along with assays from any other Flex Set system (soluble protein, cell signaling, etc.). For an updated assay compatibility chart for the BD CBA Human Enhanced Sensitivity Flex Sets, please refer to the BD CBA Flex Set System homepage at http://www.bdbiosciences.com/cbasetup.

#### Performance

**Limit of Detection:** The theoretical limit of detection is 88.9 fg/mL and was determined by evaluating the estimated result of the average MFI of the negative control (0 fg/mL, n=30) + 2 standard deviations.

	Inter-Assay Reproducibility			Intra-Assay Reproducibility			
Specificity	Mean (fg/ml)	Standard Deviation	%CV	Mean (fg/ml)	Standard Deviation	%CV	
	Sample 1	2,254.8	276.6	12%	2,077.7	94.0	5%
Human IL-2	Sample 2	6,502.4	693.5	11%	6,013.0	145.2	2%
	Sample 3	19,064.1	1,466.4	8%	17,756.2	725.1	4%

Reproducibility: The intra-assay and inter-assay reproducibility were determined for the BD CBA Human IL-2 Enhanced Sensitivity Flex Set by evaluating ten replicates of three different sample levels (intra-assay) and three replicates of three different sample levels from four separate experiments (inter-assay) respectively.

	Cell Culture Supernatant		Ser	um	Plasma	
Specificity	Average % Recovery	Range	Average % Recovery	Range	Average % Recovery	Range
Human IL-2	73%	72 - 75%	69%	68 - 70%	64%	61 - 66%

**Recovery:** Cell culture supernatant, serum, or EDTA-treated plasma were spiked with three different levels of protein. The spiked samples were assayed and the results were compared with expected values. Serum and plasma samples were diluted 1:3 before the protein was spiked into each. Serum is a pool of 800 - 1000 donors and the plasma was pooled from at least 20 donors.

Comula Dilution	Cell Culture Supernatant		Ser	um	Plasma		
Sample Dilution	Detected (fg/ml)	% of Expected	Detected (fg/ml)	% of Expected	Detected (fg/ml)	% of Expected	
Spiked sample	17,164.7	100%	13,894.5	100%	12,034.7	100%	
1:3	5,240.9	92%	5,287.2	114%	4,906.6	122%	
1:9	1,701.1	89%	1,696.8	110%	1,625.5	122%	

Linearity: Cell culture supernatant, 1:3 diluted serum, or 1:3 diluted EDTA-treated plasma were spiked with protein and serially diluted. The diluted samples were assayed and the results were compared with the original spiked sample.

## **Product Notices**

1. ProClin is a trademark of Rohm and Haas Company.

- This product is manufactured and sold under license from Pestka Biomedical Laboratories, Inc. (d/b/a PBL InterferonSource) and may be used solely as indicated. This product may not be resold or incorporated in any manner into another product for resale. Any use for therapeutics is strictly prohibited. This product is covered by U.S. Patent No. 5,597,901 and Bulgarian Patent No. BG1895.
- 3. Source of all serum proteins is from USDA inspected abattoirs located in the United States.
- 4. Caution: Sodium azide yields highly toxic hydrazoic acid under acidic conditions. Dilute azide compounds in running water before discarding to avoid accumulation of potentially explosive deposits in plumbing.
- 5. Please refer to www.bdbiosciences.com/pharmingen/protocols for technical protocols.
- 6. Warning: CBA lyophilized standard contains 0.02% (w/w) and Detection Reagent (Part A) contains 0.002% (w/w) of a CMIT/MIT mixture (3:1), which is a mixture of: 5-chloro-2-methyl-4-isothiazolin-3-one [EC No 247-500-7] and 2-methyl-4-isothiazolin-3-one [EC No 220-239-6] (3:1).

Hazard statement: May cause an allergic skin reaction.

Precautionary statements: Wear protective gloves/eye protection. Wear protective clothing. Avoid breathing mist/vapours/spray. If skin irritation or rash occurs: Get medical advice/attention. IF ON SKIN: Wash with plenty of water. Dispose of contents/container in accordance with local/regional/national/international regulations.
